## ABOUT US

From modest beginnings in 1995, Matrix Orbital has grown into a world-renowned communication interface display solution provider. After recognizing the need for an advanced and easy-to-use display, Matrix Orbital designed a revolutionary intelligent interface for OLEDs, TFTs, LCDs, and VFDs that has been used in defence, aerospace, and advanced technology industries. Since then, through creativity, imagination, and determination, our product line has grown dramatically to accommodate the needs of you, our customer.

Our dependable, flexible and easy-to-program Serial, RS422, I<sup>2</sup>C and USB displays are highly suitable for applications ranging from short-run prototyping to large-volume production runs, fully customizable to your needs. To remain competitive in the marketplace, Matrix Orbital continues to add to its selection of high-quality displays.

At Matrix Orbital, we strive to offer the most comprehensive technical support in the industry. Through innovation and willingness to listen to our customers, Matrix Orbital can provide solutions that the competition cannot. By identifying the needs of our customers we meet and exceed expectations. From our Canadian headquarters and manufacturing facilities, our team is ready to work with you to create the perfect display.

### FULL COLOR TFT DISPLAYS

Matrix Orbital's GTT series of intelligent displays combine top of the line TFTs with integrated touch screens, 2GB of on-board memory for custom fonts, animations, and graphics, a piezo buzzer and vibratory motor for audio and haptic feedback, and much more! Featuring a powerful Cortex M3 processor, these displays are the culmination of Matrix Orbital's years of experience in the communication interface and GUI fields, merged with a dazzling full color display, available with resistive or capacitive touch and utilizing an extended version of our widely used command library and industry standard communication protocols (RS232, I2C, TTL, RS422 and USB).

Crafted to become crisp, controllable canvases for creativity, and combined with our new, easy to use, GTT Designer software, the customizable GTT series will quickly become the gorgeous face of your application.

Custom sizes and designs are available upon request \*Product not yet released. Specifications subject to change.

- TFT Touch Screen with bright, vivid 16-bit color
- 2 GB of on board memory for fonts, graphics and animations
- Programmable to display any language
- Voltages available: 5 Vdc or 9-35 Vdc.
- Piezo Buzzer and vibratory motor to provide audio and tactile feedback
- Simple command structure for fast and easy development
- Free GTT Designer software, with numerous tools to allow you to create screens and interfaces
- One year warranty
- Full technical support available including sample code
- 6 General Purpose Outputs
- A powerful Cortex M3 processor running at 120MHz
- 32MB of RAM, 64MB on GTT50A and GTT70A
- Wide variety of accessories available, including power and mounting solutions
- Customizable options, with low production minimums

### CHARACTER LCD

Covering the most popular liquid crystal display configurations, control of the modules has been simplified to a set of commands delivered via RS232, RS422, I<sup>2</sup>C and USB. Meant to save time and money, we have worked to ensure that the tedious timing and special conditions typical of display controllers have been eliminated from our interface to help get your project to market faster.

### GRAPHIC LCD

The most versatile of our displays can be programmed to display any font, in any size, and in any language. With graphic displays you can easily add multi-language support to any application that uses a display. Allow your creativity to flourish with icons and graphics! We also have -1U displays which conveniently fit into any 1U application, allowing you to add graphics to even a limited space.

### GRAPHIC TOUCH LCD

Touch screen graphic LCDs display graphics and text in any font, style, justification and language, all with the convenience of a touch screen. Beautiful, easy and fun to use interfaces, all without the need of a keypad. When the touch screen is pressed, you can have the X and Y location sent through the serial port. A great looking user interface in no time at all!

### CHARACTER OLED DISPLAYS

OK162-12-OW

With OLED technology displays, control of the modules has been simplified to a set of commands delivered via RS232, RS422, I<sup>2</sup>C and USB. OLED technology gives deeper blacks, greater contrast, faster response time, lower power consumption, and higher viewing angles than LCDs. Fully customizable, vivid text for your application!

### CHARACTER VFD

Our vacuum fluorescent displays (VFDs) have a longer life and are the brightest of displays, allowing for readability even in direct sunlight. Compared to LCDs and OLEDs, they do not suffer from performance effects due to varying temperature and they deliver a higher viewing angle. Control of modules has been simplified to a set of commands delivered via RS232, RS422, I<sup>2</sup>C or USB communication. Optional VFD Filters available to customize your display to coordinate with your application.

MOS-AV162A-NT3SE

Vacuum Fluorescent Displays (VFD's) can be easily configured to display a wide variety of customized messages. VFDs also have the advantage of being very robust, and are able to function normally in a variety of environments. Optional VFD Filters available to customize your display to coordinate with your application.

\*VFD Filters are available in Blue, Grey and Red (Custom filters are available upon request)

### CHARACTER LCD

Matrix Orbital MOP-Series consists of a multitude of parallel display options to enhance your product. With our large variety of colors and our ability to produce custom displays we are committed to helping you succeed to get your product noticed. We offer competitive pricing on all our parallel modules and have the lowest lead times in the industry to save you time and money!

MOP-AL242A-BYFY

Our high quality alphanumeric parallel displays feature industry compatible HD44780 4/8 bit controller.

### GRAPHIC TOUCHSCREEN

MOP-GLT240128D-BGFW

Touch screen graphic LCDs can display graphics and text in any font, style, justification and language, all with the convenience of a touch screen. Beautiful, easy and fun to use interfaces, all without the need of a keypad. When the touch screen is pressed, you can have the X and Y location sent, or have the on-screen keyboard displayed and touched keys are sent through the serial port. A great looking user interface in no time at all!

- Our Graphic LCD Touch Panel provides you with a cost effective user interface solution for that great product/project you are developing.

- Our high quality graphic parallel displays feature industry compatible T6963 8 bit controller.

- Full touch screen, no keypad needed

- On board memory for Fonts and Bitmaps

- RS232, RS422, I<sup>2</sup>C or USB interface available

ESCCPC5V	External communication and power cable with flow control, 2ft long Compatible with GTT, GLT/GLK24064, GLT/GLK240128, GLT / GLK24064R-XX-1U

### INTERFACE MODULE

The X-Board is the simple solution for an economical interface board. Add Matrix Orbital's intelligence to your existing parallel character LCD or VFD for quick and easy prototyping. Features include Matrix Orbital's industry standard intelligence, 3 GPO's, software controlled back light and contrast, and supports a variety of interfaces. Use the S-Series for serial and TTL, the I-Series for I2C or the U-Series for USB.

### CHARACTER LCD PC BAY INSERTS

Matrix Orbital has developed a 5/4" PC drive bay insert with display in response to customer demand for an effortless way to mount our intelligent displays in PCs. The inserts were designed as a light weight, high quality product. Using durable, rust resistant metal, these inserts will stand up to everyday wear-and-tear. Our PC inserts are available in two sizes, to fit single 5/4" drive bays and double 5/4" drive bays. All mounting hardware and cables are included!

### ENCLOSED CHARACTER DISPLAY

Two enclosures to meet your needs, a lightweight durable plastic and a rugged metal. Both feature a 20x4 display with 7 Key tactile keypad and 3 tricolor indicator LED's. Control of this LCD display has been simplified to a set of commands delivered by RS232 or USB

No more mounting guesswork! With the threaded mounting hole on the plastic enclosure and the included mounting brackets for the metal enclosure, they can mount almost anywhere to achieve the best viewing angle.
